LSZ

These long-nosed sealing pliers can be used wherever access to the films to be sealed is difficult and the standard sealing pliers cannot be used owing to their shape. The forwards pointing sealing bars can be used to conveniently seal together tubular films from the roll for example. These handy pliers dispense with laborious adhesive joining of the film strips. The fields of application are to be found in the manufacture of thin webbing materials on rolls or also with automatic bag making machines.

TECHNICAL DATA

LSZ 300

Sealing length (mm)	300
Sealing width (mm)	3
Film thickness (mm)	2x0,30
Power	250 W
Connection	230V/50 Hz
Weight of impulse unit	Kg. 3,8
Weight of tong	Kg. 2
Material	Thermoplastic films

LSZ 400

Sealing length (mm)	400
Sealing width (mm)	3
Film thickness (mm)	2x0,30
Power	250 W
Connection	230V/50 Hz
Weight of impulse unit	Kg. 3,8
Weight of tong	Kg. 2,1
Material	Thermoplastic films
