## STP 400

This film sealing device is used for closing heavy and duty bags.

Thanks to heating wire 4 mm wide, positioned on both jaws, it's possible to seal any types of thermoplastic thickness bags.

The sealing starts for a few seconds when the pedal is lowered and the sealing time can be regulated in accordance to the bag's gauge. STP 400 can be suitable with bead heating band in order to achieve separation with a wider sealing seam.

### **Optional:**

Worktable in stainless steel  
Bead heating band  
Modification on request

## TECHNICAL DATA

### STP 400

Sealing length (mm)	400
Sealing width (mm)	4
Max sealing output (mm)	2x0,50
Power	500 W
Connected voltage	230V-50 Hz
Dimensions (mm)	420x500x110h
Weight	Kg. 26.
Materials	Polyethylene Polypropylene, PEHD, PELD, BOPP, PVC.

Technical alteration without prior notice.
