SZ-G 380

These sealing pliers allow mobile film sealing at almost any location.

A 12-volt battery is all that is required. Our tried and trusted SZG mobile 380 hand sealing pliers are firmly and safely connected to the handy impulse unit.

As usual, the impulse time is continuously adjustable.

Cable length of a total of 6 meters allow a wide working radius.

The possible application of the SZG 380 are versatile:

Fire brigades and aid organisation use this mobile unit for sealing in breathing apparatus or contaminated materials for example. It is also used however in agricultural applications for sealing hay or straw.
